RANGE OF COMPONENTS FOR AUTOMOTIVE

PREMO

HIGH QUALITY
Inductive Components

HIGHLIGHTS

PREMO strength relies on the **design, manufacturing** and delivering **added value** products and services based on **inductive components know-how.**

Fully automated production lines

100Mpc in the field

Quality focused

Long-term customer relationship

Global supplier capabilities

R&D support worldwide

Fast Customer service reaction

Cost-effective manufacturing production

Custom and Standard design

INNOVATIVE COMPONENTS FOR AUTOMOTIVE

PLANAR POWER TRANSFORMER

Vacuum potting features high isolation level (10kV), robust performance and high power density in low profile.

CHOKES

Common mode and differential chokes with high power performance.

TOM1203
SMD
Transponder
Overmoulded.

TP0702
The best performance in smallest size.

POWER CONVERTERS

HYBRID CARS:
DC/DC Converters,
Battery chargers, DC/AC
Inverters, BMS, Start/stop
systems.

INMOBILIZERS

PKE/KES/KG

TPMS

KCA*
Base station
overmoulded antenna.

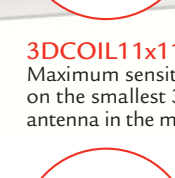

RECEIVER ANTENNA

EMITTER ANTENNA

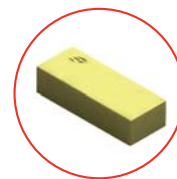

SDTR1103
Super drop-test
SMD resistant coil.

3DCOIL11x11LP
Maximum sensitivity
on the smallest 3D
antenna in the market.

KGEA-DH
Door Handler Antenna
with the longest
emitting range.

FOM 1103*
New design concept with
best mechanical
resistance.

3DCOIL15x15
The longest working
range on every axes.

KGEA BFCR
Simple assembly emitter
antenna with easiest
connection design.

Other automotive applications using PREMO components:

- ABS system
- Gear boxes
- Xenon lights
- Car radio
- Navigation systems
- Baby child detection
- CAN Bus
- Ignition system
- Fuel tank system

PREMO Management systems certifications and accreditations

- ISO 9001:2000
- ISO/TS 16949:2002
- ISO 14001:2004
- UNE-EN ISO/IEC 17025
- FULL AECQ-200 qualified components

* Under development.
