Introduction

Premo PLC develops and manufactures MV accessories since 1998 for PLC access deployments. Among our products, we highlight MV couplers either inductive and capacitive as well as single and multimode coexistence filters. Broadband Power Line is a relatively new technology to transmit high speed broadband through existing electrical network.

Medium Voltage single mode coexistence filters

Medium Voltage coexistence filters

Medium Voltage underslab capacitive coupling unit (up to 24 kV)

Medium Voltage inductive coupling unit 300 A

Medium Voltage overhead capacitive coupling unit (up to 24 kV)

Low Voltage inductive coupling unit 150 A

MV DISTRIBUTION SCENARIOS

MVoberhead Distribution Lines Scenario
