Introduction
Premo PLC develops and manufactures LV in-building and in-home products since 1998, to bring PLC signal into home, such as inductive couplers with different standing currents as well as capacitive couplers, blocking filters, LV coexistence filters and wall plug noise filters, as well as components to make CPE's working properly.

3-Phase blocking filter
EP13 flyback transformer for CPE SMPS
PLC signal transformer
Chip inductors for coexistence filtering purposes

Low Voltage capacitive coupling unit

Single Phase Blocking filter

Wall plug noise filter
Wall plug Low Voltage capacitive coupling unit with BNC connector

Low Voltage coexistence filters and splitter box
